

# New **STANFORD HOSPITAL**

*Healing humanity through science and compassion, one patient at a time*

Stanford Health Care is building a revolutionary new hospital facility to accommodate advances in medical technology, increase capacity needs, meet new seismic safety requirements and transform the way that patient care is delivered.

The 824,000-square-foot hospital facility was designed by internationally-recognized firm Rafael Viñoly Architects in association with Lee, Burkhardt, Liu, Inc.

Construction of the hospital is currently underway and officially broke ground on May 1, 2013. The new hospital is expected to be completed in 2017 and open for patient care in early 2018. The facility will be connected to the existing hospital by bridge and tunnel. Stanford Health Care will remain fully operational during construction.

## Project Highlights

- Privacy, comfort and patient safety through individual patient rooms
- 368 beds in the new hospital building for a total of 600 patient beds on-site
- A new Level-1 Trauma Center and Emergency Department, more than twice the size of the current ED
- State-of-the-art diagnostic and treatment rooms including 17 operating rooms, 11 interventional/radiology image-guided rooms, five MRIs, four CTs and one interventional MRI
- Five gardens for patients and visitors, walking trails and a meditation room
- A flexible pavilion design with oversized windows to provide natural light and views of the surrounding foothills
- New parking structure

## The New Stanford Hospital

The new Stanford Hospital will create a healing environment tailored to each patient's unique needs. The finest facilities and medical care anywhere will be available with the flexibility to adapt to new technologies and life-saving innovations not yet discovered.

## Construction Timeline

### 2013

- Demolition of 1101 Welch Rd
- May 1: official groundbreaking
- Shoring and mass excavation

### 2014

- Foundation work/installation of base isolators
- Foundations complete
- Steel installation

### 2015

- Construction of exterior and interior begins

### 2016

- Construction of exterior complete
- Construction of interior continues

### 2017

- Construction of interior complete
- Equipment installation and activation activities

### 2018

- Opening of the new Stanford Hospital

## About the Renewal Project

The new Stanford Hospital is part of the Stanford University Medical Center Renewal Project, which includes the expansion of Lucile Packard Children's Hospital Stanford, the renovation of Hoover Pavilion, the Welch Road Utility Project and the replacement of School of Medicine facilities. The Medical Center must rebuild and modernize its facilities in order to continue serving the region's current and future healthcare needs and accommodate advances in technology and patient care.
